TECHNICAL SKILLS

Frontend Development: React.js (Hooks, Context API, Redux), JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS.

Development Workflow: RESTful API Integration, Git/GitHub, Agile Methodology, Responsive Web Design, Cross-browser Debugging.

Testing & Tools: Playwright (E2E Testing), Figma, Technical Documentation, Performance Optimization.

PROFESSIONAL EXPERIENCE

Frontend Engineer

March 2025 – April 2026

Qalitus

Srinagar, J&K

- Developed and maintained responsive web applications using **React.js**, ensuring seamless performance across devices.
- Built and maintained a **reusable component library** using Tailwind CSS, reducing development time for new features by 25%.
- Integrated dynamic **RESTful APIs** to handle complex data flows, improving application responsiveness and user data synchronization.
- Collaborated with design and backend teams to troubleshoot issues, debug production code, and optimize **Core Web Vitals**.
- Implemented automated E2E testing suites to maintain high feature reliability and reduce manual regression testing.

PROJECTS

Author Portfolio Website

Live | GitHub

React.js, Firebase, React Router, REST API, Playwright

- Architected a dynamic, single-page application (SPA) using **React.js** and **React Router**, seamlessly integrating **Firebase** to handle real-time data synchronization, dynamic content rendering, and persistent backend services.
- Engineered robust asynchronous data pipelines to fetch and map literary metadata via **REST APIs**, implementing comprehensive error handling, custom loading states, and efficient global state management to deliver a fluid user experience.
- Designed and deployed a comprehensive end-to-end (E2E) automation testing framework from scratch using **Playwright**, featuring resilient locators, cross-browser validation, and automated assertions to verify complex UI workflows.
- Validated full-stack system integrity by writing automated tests that confirm UI state changes match **Firebase** database interactions and API responses, guaranteeing zero regressions across production builds.
- Optimized component lifecycle methods and structured reusable UI components, minimizing redundant network requests and ensuring a scalable, maintainable codebase.

EDUCATION

Bachelor of Technology in Computer Science

2022 – 2026

Lovely Professional University (LPU)

Phagwara, Punjab

- Relevant Coursework: Web Technologies, Software Engineering, Data Structures & Algorithms, DBMS, OOP (Java).
